

How to Update Software Using the Autodesk Desktop App

The **Autodesk Desktop App** is a desktop component that is installed with Microsoft Windows-based Autodesk products (2017 and later). It delivers product updates, new releases, and security patches to subscribers. It is recommended you review the list and install as necessary throughout the lifecycle of the software.

Benefits of this app include:

- Displaying only the applicable updates for your installed software.
- Automatic installation without having to download executables.

The following details how to update software using the Autodesk Desktop App:

Step 1

Go to your Start menu and click **Autodesk > Autodesk Desktop App**. Sign in to the application if not already signed in.

Step 2

Select a software product icon along the left side of the window to view the updates that are available for it.

Step 3

Locate the required update in the right-hand pane and click **Update**.

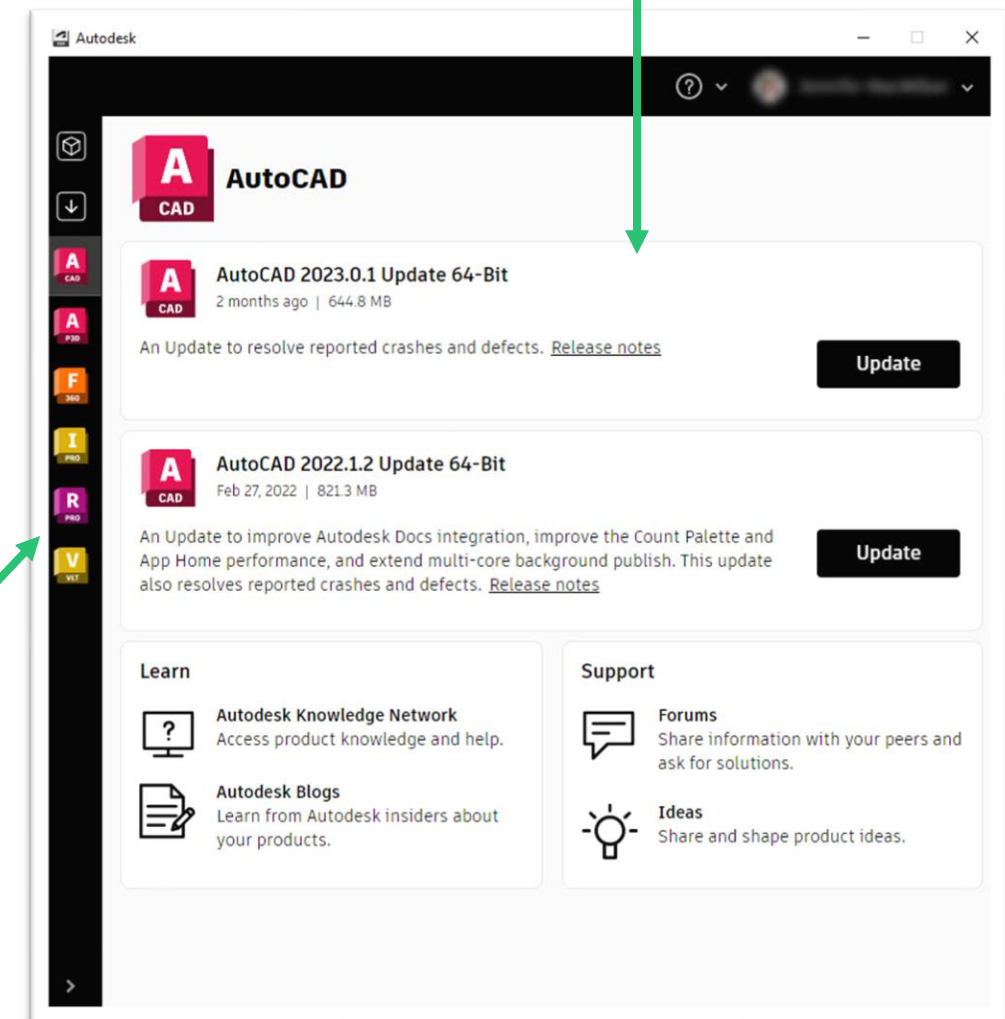

Step 4

Confirm the app can make changes and click **Install Update** once prompted that once the update begins, it cannot be cancelled.

Step 5

When complete, click **Finish**.

Tip: This area lists all the updates that you require for your installation for the selected product.

Tip: Only software products that you have installed on your computer are listed here. Select the icon for the product you want to update.
