

Getting to Know Autodesk Account – Products and Services

Products and Services

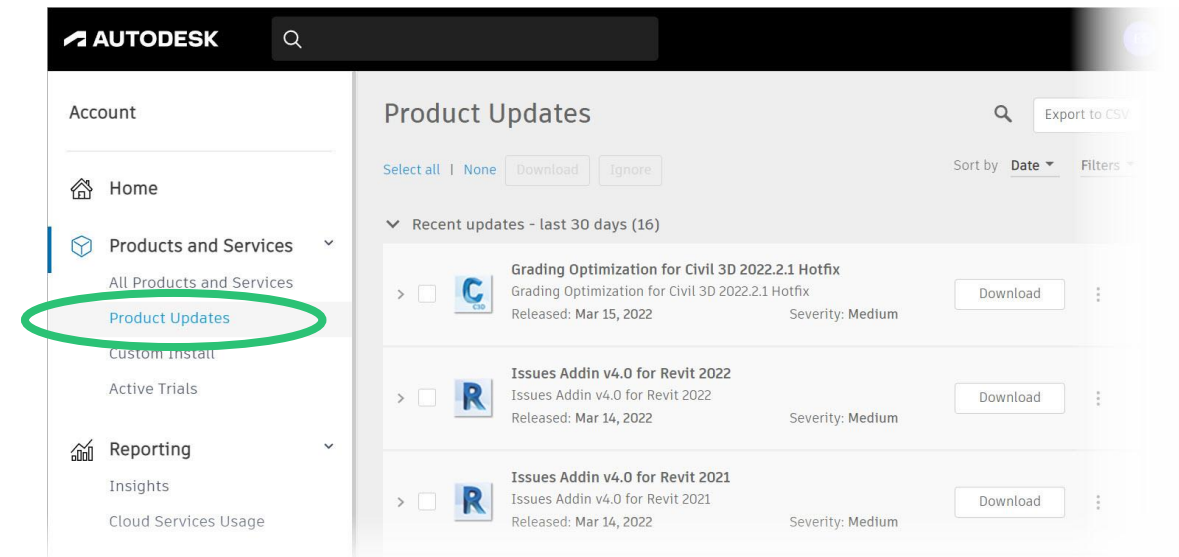

The **All Products and Services** option directs you to a focused page where you will see all the products that your primary admin has assigned to you. You can use each unique software card to access all versions and their software details.

If you do not see a required software card in your list, please contact your primary admin to ensure that they have assigned the product to you.

Product Updates

The Product Updates option directs you to a focused page that lists any product updates, hot fixes, and security updates that pertain to the products assigned to you. This list can be sorted as needed to easily review the list and download any that are required.

Custom Install

This is an advanced tool that allows you to further customize your software installation to include templates, content centers, etc. Your primary admin will advise you on this, if needed.

Active Trials

The Active Trials option directs you to a page that lists any current or expired trial software licenses that you currently have or previously had installed.
