

Course challenge exercise: Link Revit models and use Copy/Monitor

The challenge: Get a project started by enabling worksharing, linking in Revit models, and using Copy/Monitor (see Figure 1). Use the supplied file **challenge_course.rvt**. Models to link: **56750_arch.rvt** and **56750_struct.rvt**.

Complete the required activities:

- Enable worksharing and create a central model.
- Create a workset for the architectural link and the structural link.
- Link the architectural and structural models and place them on the correct workset.
- Copy/Monitor the levels from the architectural link.

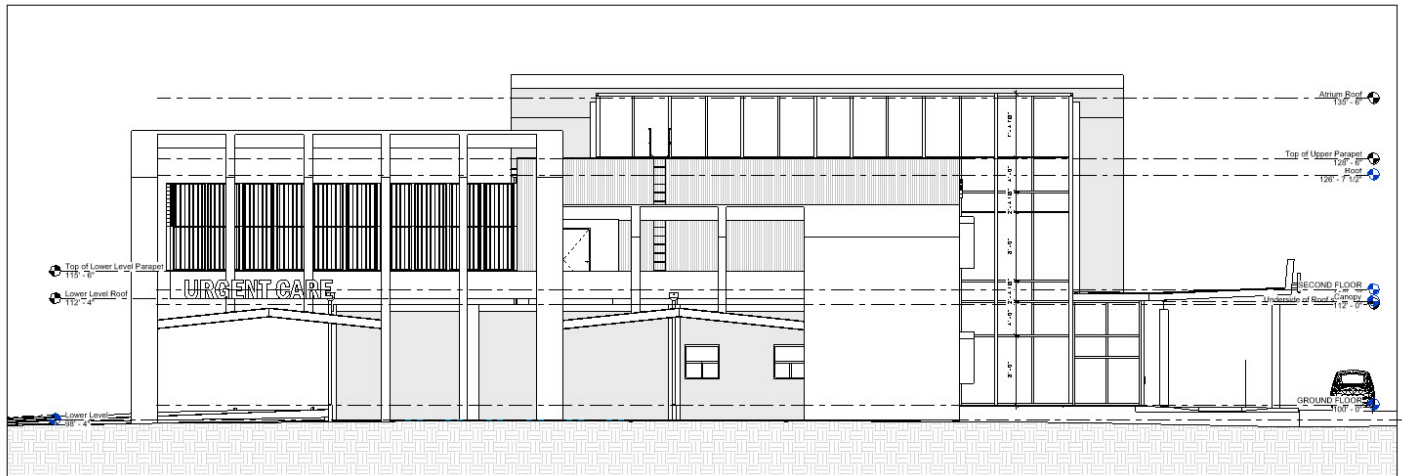

Figure 1. **56750_arch.rvt** model to link and Copy/Monitor levels.
